How temporary email works?

When you register to the service, we give you a temporary email address, use this temporary email when registering to untrusted web sites. This way the site will send spam to your temporary email address, while your real address stays safe.

Introduction to temp mail services.

nada is a temp mail or temporary email service, as such it enables the use of temporary addresses which users can copy paste why registering to untrusted websites.

In which cases you should not use temp mail?

Don't use our service for important stuff. That means anything you will be really sorry about if this inbox stops working or doesn't receive incoming mails. Do not use this service for banking, buying cryptocurrencies, registering to services you use daily and anything use will need later really.

Public - Private key creation

Your 2048-bit RSA public / private key pair is now being created. This is a very important step and can take a couple of seconds. Please be patient.

Generating key

The earliest known use of cryptography relates back to almost 4000 years ago, in ancient Egypt

Today, 4000 years later, most major cloud storage providers still have not fully adopted cryptography.
